Transition to Practice (TTP)

Texas Health and Human Services

Quality Monitoring Program
“Newly graduated nurses... have neither the practice expertise nor the confidence to navigate what has become a highly dynamic and intense clinical environment burdened by escalating levels of patient acuity and nursing workload....
### Why is a TTP program needed?

<table>
<thead>
<tr>
<th>The Problem</th>
<th>The Impact</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>The Problem:</strong> New nurses care for sicker patients in increasingly complex health settings.</td>
<td><strong>The Impact:</strong> New nurses report more negative safety practices and errors than experienced nurses.</td>
</tr>
<tr>
<td><strong>The Problem:</strong> New nurses feel increased stress levels.</td>
<td><strong>The Impact:</strong> Stress is a risk factor for patient safety and practice errors.</td>
</tr>
<tr>
<td><strong>The Problem:</strong> Approximately 25% of new nurses leave a position within their first year of practice.</td>
<td><strong>The Impact:</strong> Increased turnover negatively influences patient safety and health care outcomes</td>
</tr>
</tbody>
</table>
1ST STEP: ORIENTATION
General Orientation

- Orientation of new staff is the most important part of the education framework.
- New employees should be oriented to the work environment, the current staff, residents if possible and the expectations of their job.
- Orientation is also a time where an employer can help the employee feel like they belong within the organization since adjusting to a new position can sometimes be challenging.
General Orientation

- Orientation materials should include the following:
  - Organizational literature
  - Map of the building
  - Organizational chart
  - Schedule of training events
  - Current job description
  - Employee handbook
  - Policies and Rules
  - Job expectations

- Orientation is also the time when a mentor can be assigned to the new employee
General Orientation

- Orientation should be a fun and welcoming way to bring the new employees on board. Ways to incorporate fun into the orientation training include:
  - A welcome lunch
  - Incorporate different learning styles
  - Non-technical skills training
  - New employee support
General Orientation

- Education during an orientation period is important as it helps to stabilize staffing by:
  - Investing in employees, which they appreciate
  - Assisting staff in improving their skills and job performance
  - Improving the work environment
  - Improving staff confidence and morale

- Benefit to the employees.
General Orientation

- After the initial orientation, employers should:
  - Elicit feedback
  - Probe new and current staff
  - Complete an orientation checklist
  - Complete a three month evaluation

- At the end of 90 days, there should be an evaluation completed
New Hire Orientation Checklist

90-day Evaluation

NAME: ___________________________  DEPARTMENT: ___________________________

STAFF PERFORMANCE APPRAISAL  
90 Day Review

SUPERVISOR: Very carefully analyze employee performance in each work factor area indicated. Be certain you rate each factor separately, based solely on the performance of the preceding 90 days. (i.e. because a person was habitually tardy, that person should not be penalized on quality of work, although it could explain quantity.) Keep in mind that the concept behind performance planning and progress evaluation is that the supervisor and each employee should discuss jointly what work is being done in relation to departmental goals, and how well that work is being done.

1. Organizational Skills: Plans, prioritizes and completes work in a timely manner.
   - Meets expectations
   - Does not meet expectations

2. Working Relationships: Maintains professional relationships with residents, staff, and family members. Understands and recognizes cultural differences.
   - Meets expectations
   - Does not meet expectations

3. Accountability: Carries out instructions and job duties in a dependable and reliable manner.
   - Meets expectations
   - Does not meet expectations

   - Meets expectations
   - Does not meet expectations

5. Attendance: Consider the number of absences, times arriving tardy, length of lunch periods and number and length of breaks.
   - Outstanding record of attendance and punctuality
   - Rarely absent or late
   - Some problems with attendance, punctuality or misuse of time
   - Has serious problem with attendance, punctuality or abuse of time

A. Overall appraisal: After considering all factors, indicate on the scale the description which most accurately characterizes your overall appraisal of this individual.
   - Consistently surpasses job requirements
   - Performs with minimum supervision and direction
   - Generally meets established work
   - Requires excessive supervision and attention
   - Fails to meet job requirements

Explanation:
___________________________________________

Major strengths include:
___________________________________________

Describe staff member’s outstanding accomplishment(s):
___________________________________________

Recommendations for continuing development and improvement: (Include developmental activities the employee should undertake to prepare himself/herself for future assignments and responsibilities.)
___________________________________________

List and comment on any courses or training the employee has taken to improve Skills, abilities, and/or job knowledge within the past year. Staff member’s comments:
For me to improve my work performance or qualifications for promotion, I feel I need:
(e.g. skill training, “hands on” experience, closer supervision, college courses, etc.)
___________________________________________

B. This evaluation has been discussed with me by my immediate supervisor.

Employee’s Signature ___________________________  Supervisor’s Signature ___________________________

Date ___________________________  Date ___________________________
2ND STEP:
CORE COMPETENCIES
Competencies

- Competencies are the observable and measurable set of:
  - Knowledge
  - Skills
  - Abilities

- They are necessary to perform the job effectively
It is recommended that an evaluation of one’s nursing skills be done upon hire of a new graduate nurse or when a newly hired nurse is coming from a different care area.

Evaluations can take many forms:
- Skill check-off
- Clinical Competency Examination
- Peer Observation
Differentiated Essential Competencies (DECs)

- Texas Board of Nursing has a list of the DECs that nurses are expected to have. They fall under the following categories:
  - LVN
  - RN – Diploma/Associate’s prepared
  - RN – Bachelor’s prepared

- BON DECs can be found online at:
3rd Step: Teamwork
Teamwork

- Teamwork is truly all around us
  - Individuals across the world are safer in health care delivery systems where teamwork principles are practiced on a daily basis.
  - Example: reduction in pressure ulcers, error reduction, increase in positive attitudes, and reduction in turnover, just to name a few.

- What is Teamwork?
  - Team-based care is the provision of services to individuals, families, and the Nursing facility community by at least two providers who work collaboratively with residents and their caregivers – to the extent preferred by each resident – to accomplish shared goals within and across settings to achieve coordinated, high-quality care.
Teamwork

What is Teamwork?

- Working interdependently
- Coordination of tasks
- Free exchange of information
- Dynamic interaction
- Working toward common goals
Promoting Teamwork

- Training and Development
- Flexible and collaborative management
- Consistent, appreciative feedback
Who are the Members of the Team

- Resident
- Core Team
- Contingency Team
- Coordinating Team
- Ancillary & Support Services
- Administration
High Performing Teams

- High-performing teams have some common traits:
  - Members can anticipate each other’s needs
  - Have clear roles and responsibilities
  - Have a clear, valued, and shared vision
  - Strong team leadership
  - Engage in regular discipline of feedback
  - Develop a strong sense of collective trust, team identity, and confidence
  - Create mechanisms to cooperate, coordinate, and generate ongoing collaboration
  - Manage and optimize performance outcomes
Outcomes of Teamwork

- Improve resident outcomes
- Reduce clinical errors
- Increase resident satisfaction
- Increase staff satisfaction
- Reduce staff turnover
- Reduce resident and family grievances and complaints
Influencing the outcomes of Teamwork

- Consider these principles and skills to influence teamwork outcomes:
  - Control yourself
  - Listen first
  - Don’t preach about what is wrong
  - Don’t whisper behind closed doors
  - Redirect
  - Conceptualize
  - Explore
  - Feedback
Barriers to Effective Teamwork

- There are many barriers to effective teamwork:
  - Inconsistency in team membership
  - Lack of time
  - Lack of information sharing
  - Hierarchy
  - Defensiveness
  - Varying communication styles
  - Conflict
  - Workload
  - Lack or role clarity
4<sup>TH</sup> STEP: COMMUNICATION WITH THE HEALTHCARE TEAM
Communication is the response you get from the message you sent regardless of its intent.

-Author Unknown
Communication

- Communication is the lifeline of a well-functioning team
- Important component of the team process
- Communication skills interplay directly with leadership, situation monitoring, and mutual support
- It is also important to recognize the resident as part of the team and be aware that clinical and nonclinical people have an important role in affecting the care of the resident
Emotional Intelligence

- Consists of 4 attributes:
  - Self-awareness
  - Self-management
  - Social awareness
  - Relationship management

5 Strategies to build Emotional Intelligence:

- Rapidly reduce stress in the moment
- Beat relationship stress with emotional awareness
- Use nonverbal communication
- Use humor and play to deal with challenges
- Resolve conflict positively
Methods of Communicating with the Healthcare Team

- **SBAR**
  - Situation
  - Background
  - Assessment
  - Recommendation

- **Call-Outs**

- **Check-Backs**

- **Handoffs**
  - I PASS the BATON
Call-Outs
Check-Backs
Handoffs
“The single biggest problem in communication is the illusion that it has taken place”
Some of the challenges that may exist in communication are:

- Language barriers
- Distractions
- Physical proximity
- Personalities
- Workload
- Varying communication styles
- Conflict
- Verification of information
- Shift changes

Knowing the challenges that your staff face with regards to communication is the first step in overcoming the challenges.
5\textsuperscript{TH} STEP:
SCOPE OF PRACTICE
LVN vs. RN
Scope of Nursing Practice

- Chapter 301 of the Texas Occupations Code (TOC)
  - Nursing Practice Act (NPA) Section 301.002 (5), Definitions
  - Nursing Practice Act (NPA) Section 301.353, Supervision of Vocational Nurse

- Texas Administrative Code (TAC) Title 22, Part 11, Chapter 217, Rule §217.11: Standards of Nursing Practice
  - Standards applicable to all nurses
  - Standards specific to Vocational Nurses
  - Standards specific to Registered Nurses

- BON Position Statements
  - [https://www.bon.texas.gov/practice_bon_position_statements.asp](https://www.bon.texas.gov/practice_bon_position_statements.asp)
    - 15.27: The Licensed Vocational Nurse Scope of Practice
    - 15.25: The Registered Nurse Scope of Practice
Scope of Practice

Vocational Nurse

- Provide safe, compassionate, and focused nursing care to assigned patients with predictable health care needs.
- Examples of duties include:
  - Monitor patients’ health – such as checking their blood pressure
  - Discuss health care with patients and listen to their concerns
  - Report patients’ status to registered nurses and doctors
  - Keep records on patients’ health
  - Experienced licensed practical and licensed vocational nurses oversee and direct other LVNs and unlicensed medical staff

Registered Nurse

- Provide safe, compassionate, and comprehensive nursing care to patients and the families with complex health care needs.
- Examples of duties include:
  - Set up plans for patients’ care or contribute to existing plans
  - Observe patients and record the observations
  - Consult with doctors and other healthcare professionals
  - Help perform diagnostic tests and analyze results
  - Teach patients and their families how to manage their illnesses or injuries
Scope Creep

- The gradual broadening of the scope of function of a nurse beyond the traditional boundaries.

Follow these steps to determine if you are participating in scope creep

- **Step One:** Is the act consistent with the Texas NPA?
- **Step Two:** Is the activity appropriately authorized by a valid order when necessary, and in accordance with current policies and procedures?
- **Step Three:** Is the act supported by positive and conclusive data from nursing literature, nursing research, and/or research from a health related field (such as evidence based practice standards)?
- **Step Four:** Do you personally possess current clinical competence to perform the task safely from knowledge acquired in a basic nursing education program, post-basic program, or continuing education program?
- **Step Five:** Is the performance of the act within the accepted “standard of care” which would be provided in similar circumstances by reasonable and prudent nurses who have similar training and experience?
- **Step Six:** Are you prepared to accept the consequences of your actions?
6\textsuperscript{TH} STEP:
RNS ROLE DELEGATION
The role of the RN in the facility is:

- Direct and supervise care delivered by other nursing personnel
- Oversee each resident’s overall health and medical histories
- Ensure the best, individualized care possible
- Advocate for the residents
- Provide education
- Coordinate care
- Interpret resident information and make critical decisions about needed actions
- Quality improvement
Delegation is a skill that maximizes the available resources in the interest of resident care.

Should be based on the RN’s judgement concerning a resident’s condition, the competence of all members of the team, and the degree of supervision required.

Five Rights of Delegation:
- Right Task
- Right Circumstance
- Right Person
- Right Direction/Communication
- Right Supervision
<table>
<thead>
<tr>
<th>Nursing Service Administrator</th>
<th>Staff Nurse (RN/APRN)</th>
</tr>
</thead>
<tbody>
<tr>
<td>❖ Appropriate activities for consideration in delegation decisions are identified in Unlicensed Assistive Person (UAP) job description/role delineation</td>
<td>❖ Appropriate delegation activities are identified for specific clients (s)</td>
</tr>
<tr>
<td>❖ Organizational policies, procedures and standards describe expectations of and limits to activities</td>
<td>❖ Appropriate activities are identified for specific UAP.</td>
</tr>
</tbody>
</table>
Right Circumstances

Nursing Service Administrator

- Assess the health status of the client community, analyze the data and identify collective nursing care needs, priorities, and necessary resources
- Provide appropriate staffing and skill mix, identify clear lines of authority and reporting, and provide sufficient equipment and supplies to meet the collective nursing care needs
- Provide appropriate preparation in management techniques to deliver and delegate care

Staff Nurse (RN/APRN)

- Assess health status of individual client(s), analyze the data and identify client specific goals and nursing care needs
- Match the complexity of the activity with the UAP competency and with the level of supervision available
- Provide for appropriate monitoring and guiding for the combination of client, activity, and personnel
Right Person

Nursing Service Administrator
- Establish organizational standards consistent with applicable law and rules which identify educational and training requirements and competency measurements of nurses and UAP
- Incorporate competency standards into institutional policies; assess nurse and UAP performance; perform evaluations based upon standards; and take steps to remedy failure to meet standards, including reporting nurses who fail to meet standards to BON

Staff Nurse (RN/APRN)
- Instruct and/or assess, verify and identify the UAP’s competency on an individual and client specific basis
- Implement own professional development activities based on assessed needs; assess UAP performance; perform evaluations of UAP based upon standards; and take steps to remedy failure to meet standards
Right
Direction/Communication

Nursing Service Administrator

- Communicate acceptable activities, UAP competencies and qualifications, and the supervision plan through a description of a nursing service delivery model, standards of care, role descriptions and policies/procedures

Staff Nurse (RN/APRN)

- Communicate delegation decision on a client specific and UAP-specific basis. The detail and method vary with the specific circumstances
- Situation specific communication includes:
  - Specific data to be collected and method and timelines for reporting
  - Specific activities to be performed and resident specific instructions and limitations, and
  - The expected results or potential complications and timelines for communicating such information
Right
Supervision/Evaluation

Nursing Service Administrator

- Assure adequate human resources, including sufficient time, to provide for sufficient supervision to assure that nursing care is adequate and meets the needs of the client
- Identify the licensed nurses responsible to provide supervision by position, title, role delineation
- Evaluate outcomes of client community and use information to develop quality assurance and to contribute to risk management plans

Staff Nurse (RN/APRN)

- Supervise performance of specific nursing activities or assign supervision to other license nurses
- Provide directions and clear expectations of how the activity is to be performed:
  - Monitor performance
  - Obtain and provide feedback
  - Intervene if necessary, and
  - Ensure proper documentation
- Evaluate the entire delegation process:
  - Evaluate the resident, and
  - Evaluate the performance of the activity
RN Delegation

Four guidelines for effective delegation:

- Delegation requires RNs to make decisions based on patient needs, complexity of the work, competency of the individual accepting the delegation, and the time that the work is done.
- Delegation requires that timely information regarding the individual patient be shared, defines specific expectations, clarifies any adaptation of the work in the context of the individual patient situation, and provides needed guidance and support by the RN.
- Ultimate accountability for process and outcomes of care – even those he or she has delegated - is retained by the RN.
- RNs make assignments and the care provider accepts responsibility, authority, and accountability for the work assigned.
DELEGATION DON'Ts

Nursing Tasks Prohibited from RN Delegation in Independent Living Environments for Clients with Stable and Predictable Conditions

Assessments requiring RN judgment, intervention, referral or follow-up
Formulation of a nursing care plan
Specific tasks in the nursing care plan and evaluation of the client’s response
Responsibility and accountability of health teaching
Dose calculation
Injectable medications
Medications via a non-permanent tube
Receiving or requesting verbal or telephone orders related to medication administration
Initial medication doses

*See Rule 225.130(A) for exceptions.
† See Rule 225.134(1)(A) for exceptions. § See Rule 225.134(1)(B) for exceptions.

For more information, visit www.bon.texas.gov
7TH STEP:
PERSON-CENTERED CARE
Person-Centered Care

- Person-centered care promotes:
  - Choice
  - Purpose
  - Meaning

- Residents are supported in achieving the level of physical, mental, and psychosocial well-being that is individually practicable

- Honors the importance of keeping the resident at the center of the care planning and decision-making process.

- Care plans are living documents that change as the resident’s needs change

- Staff actively listen and observe in order to adapt to each resident’s needs regardless of cognitive abilities.
Comparison of Traditional Care versus Person-Centered Care

**Clinical (traditional) Approach**
- Focus on diagnosis, disability, deficit, as identified through formal assessments
- Professionals make major decisions about treatment
- The person is a client of the service system and treatment is given in service settings
- Defines the pre-requisite skills needed to move to a less restrictive service setting
- Services are impersonal, staff are interchangeable
- Focus on quality of treatment as defined by regulations and professional standards

**Person-Centered Approach**
- Focus on the person and their individual capacities and interests. Disability is one of the characteristics, not a defining one
- The person and their support network make decisions, seeking advice when needed
- The person is a citizen and is supported to participate in community life with fellow citizens
- Assume inclusion, and provide necessary support
- Individual relationships with service workers are recognized and respected
- Focus on quality of life as defined by the person
Peron-Centered Care

Principles of Person-Centered Care

- Getting to know the patient or client as a person
- Sharing of power and responsibility
- Accessibility and flexibility
- Coordination and integration
- Environments
