

PPR and PPC Performance Reports for Hospitals Accessible June 1, 2017

Information posted May 16, 2017

On June 1, 2017, hospitals will gain access to their fiscal year (SFY) 2016 hospital-level Potentially Preventable Readmissions (PPR) and Potentially Preventable Complications (PPC) reports.

These reports are compiled using fee-for-service claims and managed care organization inpatient data from September 1, 2015, to August 31, 2016 (SFY 2016). For this reporting period, payment adjustments to hospitals based on PPR and PPC performance will be effective on September 1, 2017.

The hospital-level reports will be delivered by June 1, 2017, to user accounts on the TMHP secure provider portal. To access the portal, visit tmhp.com, click "Providers," click "Log in to My Account," and enter the proper credentials. The portal contains a tab labeled "Potentially Preventable Events (PPE) Provider Reports;" within this tab are subtabs for PPR and PPC, where the corresponding report will be available for download.

Personnel who routinely access Remittance and Status Reports, submit claims, and check eligibility will have access to download the reports from the portal. For technical assistance accessing the provider portal or creating an account, contact the TMHP EDI Helpdesk at 1-888-863-3638 from 7:00 a.m. CST, to 7:00 p.m. CST. More information can be found at the [TMHP Account Activation page](#).

More information about the hospital quality-based PPR and PPC program can be found on the [HHS Potentially Preventable Events \(PPE\) webpage](#). This webpage contains additional documents and resources pertaining to this program.

For more information contact MCD_PPR_PPC@hhsc.state.tx.us or call the TMHP Contact Center at 1-800-925-9126.
