A Population Health Perspective on the 1115 Waiver Extension/Renewal

David Lakey, M.D.

Associate Vice Chancellor for Population Health
The University of Texas System

Senior Vice President for Population Health
Isadore Roosth Distinguished Professor
The University of Texas Health Science Center at Tyler
Population Health

• The health outcomes of a group of individuals, including the distribution of such outcomes within the group.
  – These groups are often defined by geographic region, age, gender, ethnic and racial background, disability, or other defining characteristic.

• Concerns include
  – the overall health of a population
  – the distribution and determinants of health and health disparities within the population.

• The population health perspective bridges the divide between traditional public health and the medical care sectors to focus on improving the health outcomes throughout a community.

The Triple Aim

• Developed by the Institute for Healthcare Improvement,

• An approach to improving the health system that simultaneously pursues three goals:
  – improve the individual experience of care (including quality and patient satisfaction);
  – improve the health of populations; and
  – reduce the per capita costs of health care.
Our Challenge

• The United States Ranks #1 in Health Expenditures at 17.9% of GDP
  – Roughly $3 Trillion aggregate annual cost
  – $8,895 per capita in 2012
  – This crowds out other state and national priorities

• The United States has Mediocre population health outcomes
  – Ranks 34th Life Expectancy
  – Ranks 42nd Infant Mortality
So, how does Texas rank in Health compared to the nation?

Counseling and Education

1115 Waivers

• The purpose of these demonstrations is to demonstrate and evaluate policy approaches such as:
  – Expanding eligibility to individuals who are not otherwise Medicaid or CHIP eligible;
  – Providing services not typically covered by Medicaid; or
  – Using innovative service delivery systems that improve care, increase efficiency, and reduce costs.

Medicaid.gov
CMS General 1115 Waiver Evaluation Criteria

• There are general criteria CMS uses to determine whether Medicaid/CHIP program objectives are met. These criteria include whether the demonstration will:
  – increase and strengthen overall coverage of low-income individuals in the state;
  – increase access to, stabilize, and strengthen providers and provider networks available to serve Medicaid and low-income populations in the state;
  – improve health outcomes for Medicaid and other low-income populations in the state; or
  – increase the efficiency and quality of care for Medicaid and other low-income populations through initiatives to transform service delivery networks.

Medicaid.gov
Texas 1115 Waiver Purpose

• Funding from the pools will be distributed to hospitals and other providers to support the following objectives:

  (1) an **uncompensated care** (UC) pool to reimburse for uncompensated care costs as reported in the annual waiver application/UC cost report; and

  (2) a **Delivery System Reform Incentive Payment** (DSRIP) pool to incentivize hospitals and other providers to transform their service delivery practices to improve quality, health status, patient experience, coordination, and cost-effectiveness.
Challenges

• Hard to tell the Texas story
  – Too many projects
  – Too many measures
  – Output vs. Outcome measures
• Evaluation based decision making
  – Eliminating ineffective projects
  – Taking effective projects to scale
• Transformation vs. Access
Measuring what really counts

- Output
  - Activities
  - Services
  - What you do

- Outcome

Waiver Metrics

Output/ Process Measures -> Clinical Measures -> Population Measures -> Social/Economic Measures

- Person
- Provider
- Facility

Current

Future

Ultimate Goal

Examples

- Birth Outcomes
  - # training sessions
  - Early Prenatal Care 17-P Administration
  - LBW % preterm birth rate
  - NICU Admissions

- Asthma
  - # education sessions
  - # parent training
  - # of kids seen by asthma van
  - patients’ compliance with asthma meds
  - # of patient asthma attacks
  - ER admissions
  - Hospital Admits
  - reduced neonatal cost
  - Infant mortality rates
  - school absentee rate
Outcomes

</tbody>
</table>
Diabetes Metrics

• Patient Centered Medical Home
• Diabetes Education
• Eye/ Foot exams performed
• Hemoglobin A1C under control
• Decreased number of amputations, loss of sight, loss of renal function
• Decreased total cost
Behavioral Health Metrics

- Number of patients seen
- Number of sites with integrated care
- Percent of patients being assessed
- Improved self assessment of mental health status
- Decreased number of state hospital admissions and incarcerations
Standardization

Deming/PDCA Cycle
SECTION 1332: STATE INNOVATION WAIVERS

Section 1332 of the Affordable Care Act (ACA) permits a state to apply for a State Innovation Waiver to pursue innovative strategies for providing their residents with access to high quality, affordable health insurance while retaining the basic protections of the ACA.

State Innovation Waivers allow states to implement innovative ways to provide access to quality health care that is at least as comprehensive and affordable as would be provided absent the waiver, provides coverage to a comparable number of residents of the state as would be provided coverage absent a waiver, and does not increase the federal deficit.

State Innovation Waivers are available beginning January 1, 2017. State Innovation Waivers are approved for five-year periods, and can be renewed. Waivers must not increase the Federal deficit.
Recommendations

• Remember the drivers of poor health in Texas
• Focus on the Triple Aim and health disparities
• Concentrate 1115 waiver on transforming Medicaid delivery systems
• Strengthen Evaluation
  – Output vs. healthcare outcomes vs. population health outcomes
• Decrease number of projects
  – Effective projects from a Triple Aim stand point should become the standard of care for Medicaid
  – Ineffective projects should be eliminated
• Increasing access should be looked at through others mechanisms or waivers
