

DSRIP Reporting Coversheet

Providers should complete a coversheet, at the project level, for each Category 1 or 2 project being reported during the reporting period. Below please clearly detail where supporting documentation can be found, what the documentation shows and how the documentation demonstrates achievement of the metric.

Providers do not need to submit a coversheet for QPI metrics or for Category 3 or 4 projects, but do need to complete the required templates.

Project Information:
