My husband came home without a scar, but there is an invisible wound that haunts us...

Brain injury can happen to ANYONE. ANYTIME. ANYWHERE.

For more information about brain injury or to obtain resources, contact:

Brain injury has become the signature wound of the wars in Iraq and Afghanistan.

In prior conflicts, only about 14-20% of all injuries were traumatic brain injuries. In Iraq, that percentage doubled.

This project is fully supported by the Health Resources and Services Administration of the U.S. Department of Health and Human Services under "Traumatic Brain Injury Implementation" grant #U20MC16375. The information contained herein comes from the Texas Office of Acquired Brain Injury and should not be construed as the official position or policy of, nor should any endorsements be inferred by HRSA, HHS or the U.S. Government.
