

EXAMPLE - Category 3 DSRIP Interventions Linked to Categories 1 & 2 - EXAMPLE

| Provider Initiative | Category 3 | | Related Category 1 or 2 projects | | | | | |
|---|--|---|----------------------------------|---|--|--|--|-------------------|
| | Project Area | Quality Improvement | Category | Project Area | Intervention | Process Measures | Improvement Measures | Allocation Amount |
| Develop a Center of Excellence to 1) share information and drive best practices across the region, 2) build technology infrastructure needed to promote and support provider communication to achieve goals #1 and 2. | Potentially Preventable Admissions/ Readmissions | Behavioral Health – Decrease PPRA (based on % of behavioral health patients who have a timely follow-up appointment (between 3 days and 2 weeks post-discharge) [2D]) | Category 1 | Introduce, expand or enhance telemedicine/ telehealth | Expand/ establish telemedicine/ telehealth program to help fill significant gaps in services | <ol style="list-style-type: none"> 1. Establish telemedicine program for selected medical service line(s) 2. Expand telemedicine program to additional clinics/service lines 3. Conduct needs assessment to identify specialties most in need of telemedicine | <ol style="list-style-type: none"> 1. Increase number of e-consultations 2. Reduce wait times in high impact specialty for consult for patient’s condition | |
| | | | Category 2 | Integrate Physical and Behavioral Health Care | Develop individual care management strategies to improve care access and coordination | <ol style="list-style-type: none"> 1. Assess need and capacity for long-term crisis intervention/ stabilization capability to improve access to behavioral health care in the most appropriate , cost effective setting 2. Assess need and capacity for early intervention or intensive wraparound services and supports for a targeted behavioral health population, including co-occurring disorders, to reduce unnecessary use of more expensive services in a specified setting. 3. Assess need and capacity for long-term crisis intervention/stabilization. Assess need and capacity for a continuum of care in the community for persons with serious and persistent mental illness (SPMI) and co-occurring disorders. 4. Implement long-term crisis intervention/stabilization model | <ol style="list-style-type: none"> 1. Increased volume of behavioral health services provided in programs/locations developed for target population 2. Reduce use of less clinically appropriate or desired care or care sites by targeted population when alternative clinically appropriate option implemented | |
| | | | | | | | | |
| | Allocation Amount | | | | | | | |

Allocations:

- **Category 1:**
- **Category 2:**
- **Category 3:**

Total Allocation:
