DSRIP Development Process

- The four DSRIP Categories were based on California's 1115 waiver with modifications for Texas differences.
- HHSC surveyed the large urban hospitals in October 2011 to assess potential DSRIP projects.
- In November 2011, HHSC hosted an RHP Planning Summit with representatives from hospitals, associations, and leadership offices
 - To brainstorm DSRIP projects and measures using survey results to structure discussions.

Clinical Champions Workgroup

- Clinical Champions was formed in February 2012 to provide DSRIP menu feedback to create a draft menu for public input.
- Members were nominated by the Executive Waiver Committee and approved by the Executive Commissioner.
- Texas Medical Foundation (TMF) Quality Institute was contracted to:
 - Assist with DSRIP menu development
 - Facilitate Clinical Champions meetings under HHSC direction.
- Clinical Champions members were divided into subgroups with each person focused on one of four DSRIP categories.
- Through subgroup meetings and two in-person meetings, the Clinical Champions advised HHSC on the current draft menu.

HHSC, TMF, and the Clinical Champions drafted the draft DSRIP menu with the following considerations:

- Creating project area standardization and allowing flexibility in achieving goals.
- Setting achievable standards that enable system transformation.
- Ensuring selected projects are reasonable and measure intended innovative program changes.
- Consider data availability and existing systems.
