### **Background**

The Health and Human Services Commission (HHSC) is responsible for the reimbursement determination functions for the Texas Medicaid Program. Proposed rates are calculated utilizing established methodologies that conform to the Social Security Act and related federal regulations, the federally approved Texas Medicaid State Plan, all applicable state statutes and rules, and other requirements. HHSC reviews the Medicaid reimbursement rates for all acute care services every two years and clinical laboratory services are reviewed annually. These biennial reviews result in rates that are increased, decreased, or remain the same. The reviews are unrelated to any rate reduction imposed by the legislature but rather conducted to ensure that rates continue to be based on established rate methodologies.

### **Methodology**

The specific administrative rules that govern the establishment of the fees in this proposal include these rules in Title 1 of the Texas Administrative Code (1 TAC):

- §355.8620, which addresses the reimbursement methodology for outpatient services provided in Indian health services facilities operating under the authority of Public Law 93-638 (Indian Self-Determination and Education Assistance Act)

The reimbursement rates proposed reflect applicable reductions directed by the 2012-2013 General Appropriations Act, H.B. 1, 82nd Legislature, Regular Session. Detailed information related to specifics of the reductions can be found on the Medicaid fee schedules.

**Proposed Rates**

The proposed procedure codes add the interpretation and technical component as payable Medicaid benefits.
